DETAILED ACTION

Allowable Subject Matter

1. Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding amended independent claim 1, the closet prior arts, Shaughnessy and Swartz disclose a method for establishing a dynamic talk group in a radio communication system comprising the steps of selecting a set of target radios from amongst the plurality of radios by a dynamic group call originator (see col. 3, lines 18-25 and col. 5, lines 49-59 of Shaughnessy), each one of the plurality of subscriber radios having a unique Internet Protocol (IP) address (see col. 12, lines 1-3 of Swartz), the dynamic group call originator being a subscriber radio located in the radio communication system (see abstract and fig. 2 of Shaughnessy); transmitting a message from the dynamic group call originator to each of the set of target radios whose IP addresses match those radios selected in step (a), the message containing a dynamic talkgroup number (see col. 5, lines 42-43; col. 6, lines 38-42; col. 8, lines 21-23 of Shaughnessy); and causing the target radios and the dynamic group call originator to establish a dynamic talk group where the dynamic group call will take place, using the dynamic talk group number (see col. 7, lines 43-52 of Shaughnessy). Shaughnessy and Swartz do not disclose the limitation "querying a dispatch database to determine a current location area for each one of the plurality of subscriber radios in the set of target radios" added to the claim, as argued by Applicants on page 1-2 of Remarks filed 07/28/04.

Claims 3-7 depend on claim 1. Therefore, they are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
